Forecast for Thursday 06 Apr 2023

Weather: Rain and drizzle in the early hours will gradually clear to more showery conditions by daybreak. Showers locally heavy at times, particularly into the afternoon and evening, with a low risk of thunder/hail and freshening north-westerly winds.

Chance of cloud-free hill tops above 800m: 10% in the early hours but improving steadily into the day to become 80% by early afternoon.

Low Cloud and visibility: Poor visibility with widespread cloud above around 200-400m during the early hours, but improving by daybreak with cloud breaking and gradually lifting through the morning, becoming largely clear of summits by early afternoon with visibility good outside of showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Showers may merge to give longer spells of rain for some areas into the afternoon and evening, and adequate waterproofs and warm layers are a must with some sever wind chill possible at height.

Recent rainfall: measured at Cat & Fiddle: altitude 511m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Wed 05 Apr 2023	1mm	1mm	1.2mm

Forecast for Friday 07 Apr 2023

Weather: A cold start with a touch of frost possible within the valleys. Any isolated valley mist patches at first, quickly clearing. A dry and fine day to follow with very good visibility and generally light, variable winds.

Maximum wind: Northerly 15 gusting 20 mph possible at first on the summits, easing into the afternoon.

Chance of cloud-free hill tops above 800m: The small chance of some isolated patchy cloud on the windward slopes to start but this clearing quickly to give clear conditions.

Low Cloud and visibility: Some early mist possible in the valley but generally clear with good visibility at all levels and any cloud well above summits.

Temperature: **Valleys:** Plus 3 Celsius becoming Plus 11 Celsius.
At 600m: Plus 1 Celsius becoming Plus 7 Celsius.
Freezing level: Above the summits.
